Description—Synopsis: The government declined to get the available pictures of the assassination, for either its investigation or the permanent archive to it. This book prints pictures of the actual once-secret staff papers and FBI and other reports proving exactly this, showing that the photographers were shunned until no choice remained, then their pictures and evidence were suppressed or misused. The consequence is that some pictures are lost forever, other not in evidence and not available. The book shows the probability of Oswald's innocence by official evidence, including a picture of the widow in which he allegedly was taken the moment of the assassination. Neither he nor a rifle is in it. There is a constant refrain, "Is this the way to investigate the murder of a President" when each of the incredible abuses of photographic evidence is illustrated. There is, today, despite the wealth of available pictures, no government file of even all those still available. Suppressed and destroyed pictures are described, photographers identified by name, correspondence, memoranda showing suppression, destruction, misrepresentation printed untouched.
